

Neira Ibrahimovic

San Diego, CA | (858) 652-9993 | neiraibrahimovic01@gmail.com | www.linkedin.com/in/neira-ibrahimovic

Technical Product Manager leading 0→1 enterprise software, cloud, API, and data platform initiatives, with hands-on experience building LLM-powered prototypes and AI workflow automations. Partners closely with engineering to translate complex customer and platform needs into scalable products.

CORE COMPETENCIES

- **Product Management:** 0→1 Product Development | Product Strategy & Vision | Roadmapping & Prioritization | Go-to-Market Strategy | Product Commercialization | Customer Discovery & Product Validation | B2B SaaS | User Acceptance Testing | Agile Software Development
- **Cloud & APIs:** AWS | REST APIs | API Specification & Payload Design | Data Modeling | Event-Driven Architecture | AWS IAM & Role-Based Access
- **AI:** AI Prototyping | AI Agents | AI Workflow Automation | Claude | Cursor
- **Programming:** Python | Java | SQL (*coursework and projects*)
- **Tools:** GitHub | GitBook | Jira | Confluence | Jama | Figma | Miro | Lucidchart

PROFESSIONAL EXPERIENCE

Illumina

Software Technical Product Manager

Aug 2023 - Present

- **Product Lead — Enterprise Data Platform**
 - Led 0→1 product strategy and roadmap for an enterprise data platform enabling centralized data management and end-to-end traceability across 10+ software applications.
 - Defined the platform's enterprise data model, persistent UUID strategy, and cross-platform integration architecture to enable scalable data lineage and interoperability.
 - Authored API specifications and integration requirements spanning REST APIs and event-driven workflows, defining endpoint behavior, request/payload structures, validation rules, and required Kafka events.
 - Conducted customer discovery and UAT with enterprise organizations including Broad Institute and Natera, translating customer feedback into product requirements and roadmap priorities.
 - Drove alpha and beta readiness by defining release criteria, adoption telemetry, launch success metrics, and customer rollout strategy.
- **Product Lead — AWS Cloud Platform**
 - Led product strategy and roadmap for an AWS-based enterprise data storage platform, translating customer and platform needs into technical requirements with engineering.
 - Drove security and infrastructure initiatives spanning IAM role-based access, secure data deletion, and checksum validation.
 - Developed the commercialization strategy for data egress, introducing usage-based metering and customer billing while balancing infrastructure costs and customer value.
- **AI Prototyping & Enablement**
 - Built AI agents to automate release-management workflows, reducing manual effort by approximately 10 hours per week.
 - Built AI-powered prototypes and web applications integrating live data to rapidly test product concepts and validate new user experiences.
 - Led an AI workshop for Software TPMs on using LLM tools to accelerate product prototyping and development workflows.
 - Created the documentation operating model adopted across 27 software product teams, standardizing GitHub/GitBook workflows, governance, and contribution processes.

- **Product Requirements & Release Lead — Enterprise Analytics Application**

- Owned product requirements and release readiness for a multiomics analytics application as part of the post-acquisition integration of two software platforms.
- Established end-to-end regulatory traceability by authoring software requirements, linking upstream design inputs to downstream verification activities, and partnering with Quality and Software Test to support alpha and beta releases.
- Authored user documentation and delivered customer demonstrations, translating user feedback into roadmap priorities.

Systems Integration and Support Intern

Jun 2022 - Aug 2022

- Executed software integration, verification, troubleshooting, and release-readiness testing for a complex hardware/software platform.
- Designed and executed test protocols and comparative system studies, generating performance data used to evaluate software quality and product behavior.
- Led an intern team delivering coding workshops for a nonprofit organization and presented project outcomes to audiences of 100+; selected to emcee a company-wide event for 3,000+ employees.

EDUCATION

University of Pennsylvania

Expected Aug 2028

- *Master of Computer and Information Technology (MCIT)*

University of California, Los Angeles

Jun 2023

- *B.S. Molecular, Cell, and Developmental Biology*
- *Minor in Mathematical Biology*
- *GPA: 3.99 Summa Cum Laude*

CERTIFICATION

- Certified Scrum Product Owner (CSPO) by Scrum Alliance *Oct 2023*
